Description

After adding a context to an event there is no way to retrieve the context information, i.e. lttng list <session name> doesn't show the context information.
I think, a general rule should be, that things that can be configured should be able to be retrieved.

I used commit aeb968923d1245f4cb2be1eed2ab7b8b5eb45cf8

Here is an example sequence. As you can see "lttng list my"-comand doesn't show the context information:

```
lttng create my
```

Session my created.

Traces will be written in /home/eedbhu/lttng-traces/my-20120224-130527

```
lttng enable-event sched_switch -k
```

kernel event sched_switch created in channel channel0

```
lttng add-context -k -e sched_switch -t pid
```

kernel context pid added to event sched_switch

```
lttng list my
```

Tracing session my: [inactive]
Trace path: /home/eedbhu/lttng-traces/my-20120224-130527

```
=== Domain: Kernel ===
```

Channels:

```
-----  
- channel0: [enabled]
```

Attributes:

```
  overwrite mode: 0  
  subbufers size: 262144  
  number of subbufers: 4  
  switch timer interval: 0  
  read timer interval: 200  
  output: splice()
```

Events:

```
  sched_switch (loglevel: TRACE_EMERG (0)) (type: tracepoint) [enabled]
```

History

#1 - 02/27/2012 12:46 PM - David Goulet

- Status changed from New to Confirmed

- Assignee set to David Goulet
- Priority changed from Normal to Low
- Target version set to 2.0 stable

I will **try** to make it for 2.0-stable but it's really not sure. This is indeed a missing feature but not critical for 2.0.

#2 - 03/19/2012 02:13 PM - Yannick Brosseau

- Target version changed from 2.0 stable to 2.1 pre

postponed to next release

#3 - 06/20/2012 02:53 PM - David Goulet

- Target version changed from 2.1 pre to 2.2

#4 - 11/14/2012 01:31 PM - David Goulet

- Tracker changed from Bug to Feature
- Priority changed from Low to Normal

Moving this issue from Bug to Feature.

#5 - 01/11/2013 04:31 PM - David Goulet

- Target version deleted (2.2)

#6 - 09/01/2015 02:49 PM - Jérémie Galarneau

- Assignee deleted (David Goulet)
- Target version set to Wishlist
