

LTTng - Bug #1060

Document the extra reading subbuffer always allocated

08/30/2016 10:04 AM - Jonathan Rajotte Julien

Status: Confirmed	Start date: 08/30/2016
Priority: Low	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: 2.9	
Description On channel creation a user might only consider the size of the passed argument instead we should either warn or document that there is always an extra sub buffer allocated for reading purpose. See lib_ring_buffer_backend_allocate on lttng-modules. This also apply to userspace.	

History

#1 - 08/30/2016 11:00 AM - Jonathan Rajotte Julien

After discussion with Mathieu Desnoyers, the extra buffer should only exist while tracing in flight-recorder (snapshot) mode.
