<b>Target version:</b>	2.7		
<b>Description</b>			
Hi guys			
Issue: My trace log is still going after I disable the events. My detail log is as attachment Please help me, Thanks.			
ltnng version is : ltnng version 2.7.0-pre - Gaia -v2.6.0-rc1-242-g60f7035.			
PC is Ubuntu14.04			
I use my app "hello" as <a href="http://ltnng.org/docs/v2.6/#doc-tracing-your-own-user-application">http://ltnng.org/docs/v2.6/#doc-tracing-your-own-user-application</a> told. But I modified my hello.c is as attachment.			
To reproduce my issue:			
1/ ltnng create mysession			
2/ ltnng enable-event hello_world:my_first_tracepoint --filter '\$ctx.procname == "/hello*"' --session mysession -u -c channel			
3/ ltnng enable-event hello_world:my_first_tracepoint --session mysession -u -c channel			
4/ ./hello and press Enter to start tracepoint			
5/ ltnng disable-event --session mysession --channel channel --userspace hello_world:my_first_tracepoint			
6/ ltnng start and about 4sec later type ltnng stop			
7/ ltnng view			
Then you can view the trace log is going though you have disabled the events with filter

Hi Jonathan

It works well. Thanks a lot.

BR,  
Fang

**#6 - 09/15/2015 05:20 PM - Jérémie Galarneau**

Here is an updated version of the fix.

<http://lists.lttng.org/pipermail/lttng-dev/2015-September/025046.html>

**#7 - 09/16/2015 03:00 PM - Jonathan Rajotte Julien**

- Status changed from *Feedback* to *Resolved*
- % Done changed from 0 to 100

Applied in changeset lttng-tools:tools|commit:700c5a9d4dc7b552926b8ddcbba91cc13312aba0.

**#8 - 09/16/2015 04:21 PM - Jérémie Galarneau**

My version of the fix has a bad cast which can result in a crash. Also, I misunderstood Jonathan's fix, which is correct. Mea culpa!
